

30 APR 2018

Dear Sir/Madam,

It has been a disgrace for a long time that water for irrigation in Victoria and N.S.W. is not piped.

I would think we lose half of all water from the Murray by soakage and evaporation from the channels. Don't tell me about the futile and cheapskate efforts to line the channels with plastic. They have been a laughing stock in Northern Vic. for years. One hole and they're gone.

It will cost a lot of money to fix this problem but the problem is not really money is it? It is the allocation of our public funds. We seem to find untold millions to build football stadiums

Best Wishes: Carina Dick.
